

# DRILLING PAPER<sup>†</sup>

CELLULOSIC FIBER MATERIALS AND GROUND PAPER

## BENEFITS

- Effectively treats losses in porous sands, gravels, and fractures.
- Readily disperses.

## APPLICATIONS

- Effective in different concentrations as a slug treatment or as an additive to the entire drilling fluid system.
- 3 - 12 lb/bbl (typical) as part of the active system or 12 - 25 lb/bbl (typical in pill treatments).
- Performs well in combination with other lost circulation materials.

## PROPERTIES

- Appearance: Fibrous coarse
- Specific Gravity: 1.63

## TREATMENT RECOMMENDATIONS

Drilling Paper is added to water-based drilling fluids to prevent or treat lost circulation. It can be added through the hopper or directly into the pit system. Drilling Paper performs well with other lost circulation materials and may be added as a pill or maintained in the active circulating system.

Particle Size Distribution  
(typical percent retained, microns)

38μ	26%
150μ	20%
1000μ	14.5%
2000μ	12.9%
3350μ	5.6%

## PACKAGING AND HANDLING

Drilling Paper is available in 40 lb sacks. Handle Drilling Paper as an industrial chemical, wearing protective equipment and observing precautions as described in the Safety Data Sheet (SDS).
